

PhD Founders

Looking for a tutor?

Hello, my name is Yash! I tutor students in grade school through high school in the subjects of Math, Science, and English. Need help with homework help or test preparation? I can help you understand your coursework and ace your tests!

Charges range from \$15 to \$25 based on grade and topic area.

Why work with me?

I am a local high school student intern that has plenty of tutoring experience. I currently tutor math at my high school and local learning center.

I scored a 33 on ACT exam, including a perfect Math and Science subscore. As an AP Scholar with Distinction, I can certainly help you succeed!

Are you ready for a brighter future?
